PALMA DE MALLORCA

"We work for social, professional and personal development of people"

WHO WE ARE..

Education In Progress operates in the areas of the European social commitment. The main goal is to create educational opportunities with a strong intercultural and international background within the Erasmus Plus mobility program.

Education InProgress counts on 10-years experience in the field of VET Traineeship and SCHOOL & ADULT Training Courses (TC).

Our local network of companies offers high-quality level of professional experiences for your students. As well as our Trainers for the offer of TC

WHY PALMA DE MALLORCA?

Palma is a Spanish city of just over 400,000 inhabitants, very safe and well connected with many destinations in Europe. That ensures an easy and pleasant mobility experience for your students.

Despite its people-friendly size, its socio-economic sector is very dynamic and international.

The strongest ones on the island are:

- Nautic (commercial boats and private yachtes)
- Real estate
- Tourism

His dynamism attracts people from different countries to live here (Germany, Sweden, UK and more) guaranteeing a multicultural environment, fruitful also for all the professional experience with Erasmus+.

This favorable situation also creates the right conditions for the services and the education system with an international appeal.

Furthermore, the education is at the center of policy makers' interest, who constantly invest on it to maintain the attractiveness of Mallorca in Europe.

STUDENTS EXPERENCES

"I started to learn new things and aspects of Robotics that I could never discover alone. After that, I started to lead my own classrooms with children and youngsters..."

Lorenzo Pallanza

"We had the opportunity to live a truly formative Traineeship experience from a professional point of view, not comparable to the previous ones carried out in Italy..."

Fiorella Meli, Clarissa Pandino, Alessia Migliore, M.Rosaria Medici

"I was overwhelmed by the hospitality and warmth. The people at Colegio Coop. Son Veri Nou had integrated me into their everyday life..."

Linda Pollmer

Social media manager for tourism:

Amara, ingeniería de Marketing
REX4MEDIA

Robotics in school

Technology and Robotics (STEM) are not only for specialists, they are fully integrated into everyday life in society. Many European schools are reflecting the need to integrate STEM into their curricula.

Nowadays society is becoming more and more intercultural, and these differences become predominant. It is a real need for the educators, in any educational context, to acquire useful tools that can improve their way to manage intercultural group of learners.

Artists dream on living of their masterpieces.

Art VET schools don't usually include marketing tools in their curricula. This TC shares with Art teachers these important marketing tips to support students to become able to promote themselves on the market in an effective way.

TEACHERS AND STAFF EXPERIENCES

All the planned activities have been organized with extreme care and professionalism. You were even capable to organize a last-minute meeting with the colleagues from the UIB (Univesidad de las Islas Baleares).

"For thos like me, who started from a A1 level, the Spanish learning was a unique and exciting experience thanks to the harmony in the group of learners and the high-level preparation of the teachers.."
